## What is the CMI Toyota Fast Track Apprenticeship?

In February each year, CMI Toyota commence special “fast track” Toyota-specific Certificate III in Automotive (Mechanical - Light Vehicle) Apprenticeships.

The practical, specialised training is conducted at a purpose built CMI Toyota Training Centre.

Training is overseen by an experienced Automotive Technician assuming the role of Technical Training Manager.

The compulsory core learning modules and electives are provided by our partner TAFE SA during the first two years of the apprenticeship.

To make the most of this fantastic career opportunity, you will need to be ambitious, disciplined and results focused, with a strong desire to accelerate your career in an exciting automotive profession.

## Fast Track Benefits

Traditionally an apprenticeship can extend over a period of up to 4 years, depending on the achievement of the required competencies.

However it is envisaged that with the close guidance of the Training Manager and subsequent fast tracking of the apprenticeship, the necessary skill and competency requirements can be met to achieve full qualification in just two and a half years.

## What does an Automotive Technician do?

Gone are the days in the automotive industry where the only thing technicians handled was oil and grease!

As an Automotive Technician, you will get the opportunity to problem solve, use the latest technology and work as part of a team.

Automotive Technicians will primarily service and repair parts of motor vehicles such as engines, transmissions, suspension and electrical systems. With rapid changes in automotive technology, technicians are becoming more specialised in their areas of work.

## Career Opportunities

Today's sophisticated automotive environment comprises of skilled technicians working with advanced machinery and computers on sophisticated motor vehicles.

Upon the successful completion of the CMI Toyota fast track apprenticeship, the highly skilled technicians, who will be conversant with all CMI Toyota procedures, will be enticed to begin a long term career with the CMV Group, where development opportunities within the broader company are endless.

Becoming part of the CMV Group is an excellent opportunity to develop your career in the automotive industry. Successful graduates will also have the opportunity to undertake further training and become more qualified within their profession.

## Future Technology

The automotive industry is about to go through its biggest change since the introduction of engine management computers some 20 years ago!

The next generation of technicians will need to be able to maintain, diagnose and repair Toyota vehicles which include modern technologies such as hybrids, fuel cells, reversing video camera displays, satellite navigation systems and wireless vehicle internet connections.

## CMI Toyota & the CMV Group

CMI Toyota is a key subsidiary of Commercial Motor Vehicles Pty Ltd (CMV Group), and has been trading since 1934, operating a range of well-known vehicle franchises in South Australia and Victoria.

For more information about CMI Toyota and the CMV Group, visit [www.cmitoyota.com.au](http://www.cmitoyota.com.au) and [www.cmv.com.au](http://www.cmv.com.au)
