

# A driver's joy

*The "driver's truck" with the quietest cab of all, it also has a luxurious, ergonomically designed working environment and that removes a lot of the stress of a driver's job.*

**D**AF, billed as Europe's fastest-growing truck maker, has found a new home in South Australia – CMV Truck Sales and Service.

DAF trucks have earned a reputation in Europe as the "driver's truck" with the quietest cab and a luxurious, ergonomically designed working environment which takes the stress out of a demanding job.

However, DAF's new Euro 4-compliant CF and LF series vehicles are even more comfortable.

"Not just content to meet the stringent emission standards that take effect early next year, these DAF's already meet 2007 compliant standards," says Greg Linton, sales manager for DAF at CMV Trucks.

The new DAF comes in two series. The CF, with an engine range from 250hp to 450hp, handles the heavy end of the market and the LF, with engines from 220hp to 280hp, the lighter.

Both use the new Paccar engine and boast low tare weights, maximising payloads while providing outstanding fuel economy – giving a better bottom-line performance for business.

DAF last year won an international truck-of-the-year award.

Its reputation for trucks that make life easy for drivers is enhanced by a choice of the smooth AS Tronic automatic or Eaton

manual in all models.

"It's in the area of suspension and running gear that makes these trucks a joy to drive," Mr Linton says. "Buyers have a choice of DAF suspension (spring or air) and DAF running gear or the legendary Paccar 4 airbag per axle with Meritor running gear.

"DAF offers an industry-leading warranty package, including a three-year drive-train warranty, to provide peace of mind for business.

"But this is only part of the support story.

"Our new truck centre offers possibly the most advanced parts and service back-up in Australia," Mr Linton says.

"There are 29m-long pits with fully computerised lube systems, an electronic brake-efficiency tester and a "shaker" allowing our technicians to quickly identify any worn suspension parts.

"We have a great television waiting lounge and drivers can even freshen up with a shower."

The new team of DAF and CMV, which he says is the state's oldest and largest truck retailer, can "drive your success in the SA truck industry".
